

CYRUS U. CARBUNGO

Rizal Laguna | 0976-291-7562 | umalic65@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio](#)

FRAMEWORK & TECHNOLOGIES

- **Framework and Technologies** Node.js , React , React Native , Flutter , FastAPI , Laravel
- **Programming Languages** PHP , JS , TS , Dart , Python
- **Developer Tools** VSCode , Android Studio , Figma , Git , Insomnia , Supabase
- **Database** Firestore , Mysql , MongoDB , SQLite

EXPERIENCE

Armada Logics Internship

Jan 2026 , Apr 2026

- Completed intensive training in web development fundamentals, emphasizing their importance as the foundation for effective software development even with modern AI tools.
- Collaborated with newly formed teams of aspiring developers to build web applications and took the lead in developing key web pages within team projects.

Freelance Developer

Apr 2026 , Jun 2026

- Developed a React Native application for a local grocery store to digitize product price tracking and integrated an online product price lookup feature.
- Built a custom EPUB editor web application featuring a GUI-based batch element removal tool to streamline repetitive editing tasks.

PROJECTS

NovelNexus | Subscription-Based Library Management System

PHP , JavaScript , HTML , CSS , MySQL

Oct 2024 - Dec 2025

- Developed a subscription-based digital library platform with secure user access and streamlined content management
- Integrated secure user authentication and payment processing by implementing Google Auth for sign-in and Stripe for managing subscriptions.

Codeborn

RPG Maker , Cordova

April 2025 - May 2025

- Developed a mobile RPG game using RPG Maker and exported it with Cordova for mobile deployment
- Designed gameplay that blends classic RPG combat—defeating digital monsters—with interactive coding challenges, creating an engaging problem-solving experience for players.

AgriTrack

Flutter , FastApi , Node.js (Express), MySQL

April 2024 - Dec 2025

- Developed a cross-platform application (Web and Mobile) using Flutter for DA San Pablo City, creating a responsive interface while building a centralized geo-mapping and data-analytics platform for agricultural record-keeping and real-time field data visualization.
- Integrated AI-powered tools, including a chatbot for farmer assistance and a Crop Recommendation system using machine learning models to support smarter agricultural decisions

EDUCATION

Armada Logics Internship

Sept 2022 , Jun 2026

- Bachelor of Science In Information Technology - Web and Mobile Application Developer
